

# Jordan Osterberg

Senior Software Engineer

## PROFILE

Senior Software Engineer with 10+ years of proven experience in iOS / Apple platform, cloud backend, and frontend web development. Led teams in maintaining and improving existing software applications as well as developing them from scratch in a fast-paced environment. Experienced in deploying and maintaining high-performance CI/CD systems.

## SKILLS

**Languages:** Swift, Objective-C, Ruby, Bash, Kotlin, JavaScript, TypeScript, React

**Platforms:** iOS/macOS, Android, Web, NodeJS, Linux, AWS, Azure

**Tools:** Xcode, Android Studio, CircleCI, Xcode Cloud, Fastlane, UIKit, SwiftUI, Jetpack Compose, AVFoundation, GraphQL, REST, Git, AWS Lambda

## PROFESSIONAL EXPERIENCE

### Senior iOS Architect, Rapptr Labs — March 2023 - July 2024

- Partnered with numerous high-profile clients to build and improve their applications including Realtor.com, Imprint, ShoBizzy, The Tapping Solution, and more.
- Deployed 50% reduction in CircleCI pipeline cost and duration for team of 20+ engineers per code change by leading CI/CD optimization and migration effort for Realtor.com
- Increased mobile iOS team code coverage to +65% on new code by contributing to CI/CD monitoring and alerting projects
- Accelerated engineering as part of Mobile Platform team by deploying in-house Feature Flag and Analytics libraries to team of 20+ engineers powered by Optimizely, Segment, and New Relic
- Increased app security by leading mobile migration to new consumer authentication system for 3+ million active users
- Advanced and maintained mobile CI/CD systems for teams as large as 30 engineers with SDK updates, bug fixes, and new features using Fastlane, Ruby, and Bash

### Senior iOS Engineer, Rapptr Labs — August 2022 - March 2023

- Introduced team standards on app architecture to increase team efficiency and reduce bugs
- Facilitated several engineering design meetings between mobile and backend teams resulting in some projects completing deadlines by up to 2 months in advance
- Improved application stability and prevented regressions by pioneering unit testing using XCTest across all iOS partner projects

### iOS Engineer, Rapptr Labs — October 2021 - August 2022

- Streamlined the engineering process by deploying Xcode Cloud to team of 6+ iOS engineers
- Standardized engineering practices by creating reusable software libraries for REST API calls, authentication, and more, removing ~40-80 hours of engineering time per project

### Freelance Software Engineer — November 2015-Present

- Built iOS, Android, web applications, and backend services for several partners, including a medical health tracking app, a business management app, and a podcast app
